The Museo della Grafica has the pleasure to invite you to the inauguration of the exhibition

**SATURDAY 12 OCTOBER 2019 18:00**  
**MUSEO DELLA GRAFICA – PALAZZO LANFRANCHI**  
**LUNGARNO GALILEO GALILEI, 9**

The exhibition proposes a fascinating journey through art and science against the background of the exciting discoveries of contemporary science.

The recent discovery of gravitational waves, resulting from the merging of black holes and/or neutron stars, producing vibrations in space-time, adds the “rhythm” or, in a certain sense, the “sound” of space, to the millennial understanding of the Universe as a sublime but silent visual image, and invites profound reflections on the embedding of the human in cosmos, earth and society.

The exhibition itinerary, curated by Stavros Katsanevas, presents installations, sculptures, videos, graphic works and photographs taken by the following artists:

**Gorka ALDA, Pavel BÜCHLER, Attila CSÖRGŐ,**  
**Raphaël DALLAPORTA, Raymond GALLE, Bertrand**  
**LAMARCHE, Liliane LIJN, Letizia DE MAIGRET,**  
**Aitor ORTIZ, Tomás SARACENO, Jol THOMSON**
